 **Renotech Oy**

**MARINE SOLUTIONS**

We manufacture, develop and import MED-certified interior architectural elements, and other construction and decor products.

Our products are: non-toxic, environmentally friendly, non-combustible, light-weight, durable, aesthetically pleasing and easy to install.

# RENOTECH GRG GYPSUM MOULDINGS

Renotech GRG is a non-combustible, glass fiber reinforced, alfa gypsum based, moulded product. GRG mouldings are light-weight, durable, easy to handle and install.

All GRG elements are handcrafted. Each project is unique and poses it's own individual challenges, which are determined by destined use, performance requirements, adjacent elements and surrounding constructional solutions.

Shape, structure and method of installation are chosen with maximum durability, functionality and ease of installation in mind.

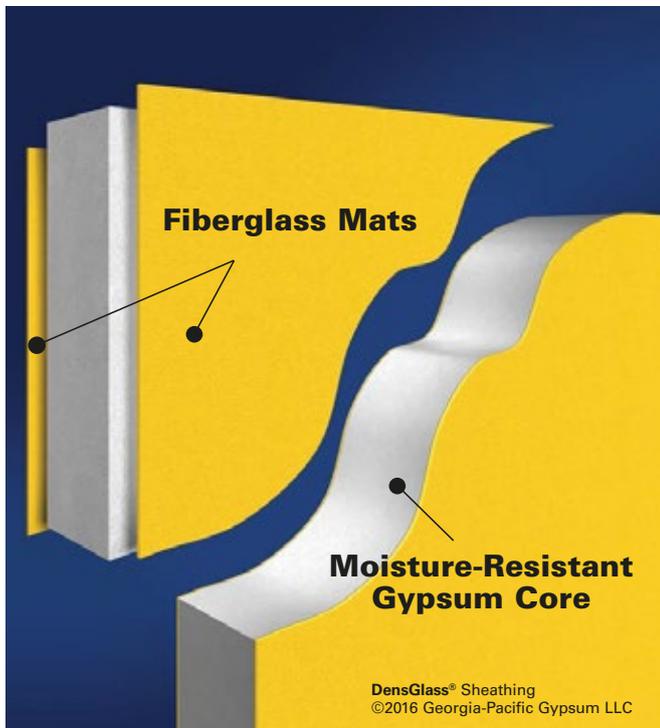

## RENOTECH DGG GYPSUM SHEATHING

Renotech DGG are non-combustible, mold- and moisture resistant, glass fiber reinforced gypsum boards.

DGG sheathing is resistant to warping, rippling, buckling and sagging on a flat and even substrate.

Renotech DGG is MED-certified interior construction material. It is used as ceiling and wall sheathing. For creating decorative ceiling elements and other interior structures. It can be bent to create curved interior elements.

## INCOMBUSTIBLE ADHESIVES

MED-certified, non-combustible (ISO 1182) Silacoll (Renofix RT) adhesives are VOC- and biocide-free, very diffusible, chemical resistant, light-weight, environmentally friendly and safe.

Silacoll adhesives provide two striking properties: its instant adhesion and non-combustibility – both in a wide range of applications and on various substrates.

Possible applications include the mounting of isolation panels, the assembly of fire-proof doors, and basically everything else you can think of.
