

## NAVAL ENGINEER – COMPETENCE CERTIFICATION

CPQ: L3034 **Specialist Qualification at Ship Building industry**

---

### **Riikka Danielsson (08.01.1979)**

**Current position: Production Manager- Shipbuilding at Renotech Oy, Finland**

Riikka Danielsson has good skills and understanding in shipbuilding in general and the whole shipbuilding process, especially interiors. Riikka knows the tight fire regulations and other special needs when it comes to the high demands of interior elements and materials used on cruise ships. This experience she has gained working with interiors in shipbuilding for several years.

Currently Riikka is working as a Production Manager at Renotech Oy. She works with an experienced team of professionals, who manufacture, assemble, install and resale fire safe and incombustible materials, mostly gypsum-based products, decorative elements, and special surfaces. Furthermore, Riikka has profoundly trained to work with Autocad design software.

Riikka has a wide knowledge and hands-on skills of different paints, surfacing materials and special techniques used in the field. She masters the whole supply chain from the first inquiry to delivery. Riikka is known to be very loyal and reliable. She appreciates honesty and openness. When something is agreed on, you can trust that it is done as promised.

Riikka has good problem solving and managing skills. She speaks fluent English and Swedish, some German and even a little Italian, which helps in the international sector. Within the last years Riikka has created good contacts to the needed network in the field. She is constantly developing herself and studying to better succeed at her work and expand her skills and know-how. Riikka is not afraid of working hard and is always ready for new challenges (The text above was written Bob Talling, Managing Director of Renotech Oy).
